

PROCESS YOUR INCOMING MAIL FASTER WHILE
INCREASING EFFICIENCY AND REDUCING COSTS

OP160

THE USER-FRIENDLY MAIL CENTER SOLUTION FOR QUICK AND PROFICIENT PROCESSING OF INCOMING MAIL

The shape and size of today's business mail is extremely diverse. Having someone tear, slice and cut open mail pieces by hand can be incredibly time intensive and costly. How would you like to be able to open 40,000 envelopes an hour (over 60 times faster than by hand) while ensuring the contents are protected from being damaged? The OP160 Letter Opener is an automatic solution to your incoming mail processing needs. By eliminating the tiresome task of manual mail opening, you can increase productivity in your organization. That means the time saved by the OP160 can be utilized for more important tasks.

For businesses that receive a large amount of mixed sized mail, the OP160 can handle it with ease. Incoming mail does not need to be sorted by size, since the OP160 can open envelopes up to 1/8" thick of all sizes and types. Just place your stack of mixed mail on the feeder and let the OP160 open it for you in seconds.

With an optional internal or external counter, to allow the tracking of the number of pieces processed, and optional variable speed control, the OP160 gives the operator maximum control over the processing of incoming mail. And the OP160's unique milling cutter protects the contents of the envelope from being damaged during the opening process. Made of steel using the highest quality components, the OP160 has two motors for better performance and longer life.

HASLER
America's better choice.®

A SUITE OF VALUE-ADDED PRODUCTS AND SERVICES THAT COMPLETE YOUR TOTAL MAILING SOLUTION

Today's fast-paced office environment requires your mailing operations to be as intelligent as the rest of your business. More than ever, you need a total solution that provides the capabilities to meet all your demands, while giving you control and transparency of every mail-related function.

Hasler's OP160 will dramatically increase office efficiency by allowing users to operate at peak performance. And to truly maximize productivity and efficiency, consider integrating a Hasler folder/inserter, a powerful address printer, high-speed tabber, or a digital mailing system into your mailing operations. Each of these products will add processing speed, enhanced performance and a professional appearance to your mail.

Intelligent mailing ensures that your entire mail process operates faster, simpler and more reliably. Hasler has the total mailing solution to meet all your important processing needs, today and as you change and grow in the future.
